

TECHNICAL BULLETIN

TRUSTED INGREDIENTS

Westlake Pipe & Fittings manufactures rigid PVC pipe and fittings for the potable water, sewer, electrical, irrigation and well markets. PVC material provides a balance of stiffness, impact resistance, UV stability and inherent UL performance for any market.

Certified Chemical Safety

- Each pipe and fitting is made from ingredients that have been standardized and openly published for decades.
- There are no phthalates, bisphenol-A (BPA), or any other plasticizers in any Westlake Pipe & Fittings rigid PVC products.
- There are no known per- and polyfluoroalkyl substances (PFAS) associated with PVC pipe production.
- Westlake Pipe & Fittings makes raw ingredients internally or controls the sourcing of ingredients. Incoming quality tests of received raw materials prove that the ingredients are fully certified for their application.
