

Power your Projects with Rigid PVC Conduit

Our rigid PVC conduit is built for wherever the job takes you, exposed, concrete-encased, or underground, giving you a smooth, protected pathway for pulling wire and safeguarding against impact and moisture.

Specified by engineers and trusted by crews, designed for a full spectrum of applications:

- > Electrical utilities
- > Data and optical fiber communications
- > Institutional, commercial, industrial buildings
- > Residential applications
- > Street and highway underground feeds
- > Transportation systems
- > Water and wastewater treatment plants
- > Marinas
