Electrical PVC Pipe

Rigid Conduit Pipe in Sizes 1/2" - 8"
Certa-Com® Trenchless Conduit Pipe in
Sizes 3" - 8"

Rigid PVC Conduit provides a protected pathway for easily pulling wire conductors. PVC conduit offers significant labor reduction to install compared to metal because it's easy to cut and join, weighs a fraction of metal, and doesn't require additional steps for direct burial. Westlake Pipe & Fittings' Rigid Electrical Conduit offers excellent performance, contributing to the overall success and efficiency of your electrical project. Our PVC conduit is UL Listed, NEC compliant, and rigorously tested to meet the highest safety and performance standards.

Certa-Com® PVC pipe is for HDD or open/continuous trench installations and features the industry's original non-metallic, mechanically restrained joint for conduit systems. The restrained joint is provided by utilizing precision-machined grooves on the conduit and in the integral bell which, when aligned, allow a spline to be inserted, resulting in a fully circumferential restrained joint that locks the pipes together. A flexible elastomeric gasket in the integral bell provides a hydraulic seal.

Certa-Com is manufactured with outside diameters (IPS sized) and wall thickness of Sch 40 pipe; it meets all requirements of NEMA TC-2 and UL 651 and is certified by the CSA. Certa-Com is widely specified for electrical utilities, data, and optical fiber communication, it helps protect infrastructure and reduce weather-related damage.

Westlake Pipe & Fittings' Electrical Pipe is designed to meet the demands of above- and below-ground applications.

- Electrical utilities
- Data and optical fiber communications
- Rigid PVC (non-metallic) conduit
- Institutional, commercial, industrial buildings
- Residential applications, including service entrances
- Street and highway underground feeds
- Transportation systems - subways, bridges, tunnels, airports
- Water and wastewater treatment plants
- Marinas
- Mines and mills
- Solar and wind farms
- Military projects

Rigid PVC Conduit Fittings and Accessories (E-Series)

Injection Molded and Fabricated
in Sizes ½" - 8"

Westlake Pipe & Fittings offers a complete line of rigid PVC conduit fittings. Westlake Pipe & Fittings non-metallic conduit and fittings are certified by the CSA and UL where applicable, for use in above and below ground applications.

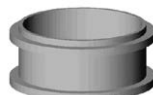

Westlake Pipe & Fittings rigid PVC conduit systems are used in non-burial applications, encased in concrete, concealed in walls and direct burial applications:

- Utilities
- Cable, data and communication lines
- Institutional, commercial, industrial buildings
- Residential applications, including service entrances
- Street and highway underground feeds
- Transportation systems - subways, bridges, tunnels, airports
- Water and wastewater treatment plants
- Marinas
- Mines and mills
- Solar and wind farms
- Military projects
