	10	250	All	82157707940	*Not recommended! See Note 3. Contact Technical Services.*			
	12	300	All	82157707940	*Not recommended! See Note 3. Contact Technical Services.*			
	16	400	All	82157707940	*Not recommended! See Note 3. Contact Technical Services.*			
	18	450	All	82157708077	*Not recommended! See Note 3. Contact Technical Services.*			

Notes:
1. Spline insertion tools are not required on the jobsite but will make spline insertion easier. Splines for smaller diameter pipes can usually be inserted by hand.
2. See Installation Guides for information on how to perform field grooving operations.
3. Certain products are manufactured with thickened spigot ends to accommodate the Certa-Lok groove while maintaining their designed performance ratings. Grooving the non-thickened pipe body will result in a less-than-designed performance for the new joint and ultimately the entire system.
   A fitting or adapter must be used rather than direct connection of shortened pipe to new pipe.
