CIOD CERTA-LOK® ADAPTERS

Westlake Pipe & Fittings is pleased to announce a new addition to our Certa-Lok® fittings offering with the introduction of CIOD Certa-Lok adapters. Westlake Pipe & Fittings' line of Certa-Lok adapters provide solutions to transitioning between Certa-Lok and standard integral bell (IB) pipe in municipal piping systems.

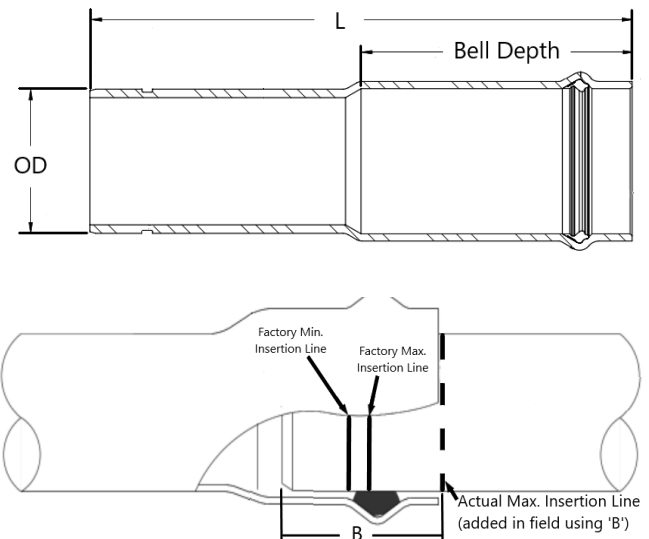

Product attributes:

- One-piece design fits C900 RJIB Certa-Lok and C900 RJ Coupled Certa-Lok
- Assembles in minutes to transition between Integral Bell pipe and Certa-Lok pipe – No cutting off the Certa-Lok groove ends
- Adapts to Certa-Lok pipe without the need for Metal sleeves or Couplings to make the connection
- Eliminates need for metal restraints and plastic wrapping for corrosion protection of the metal fittings
- Expansion Bell design allows for expansion and contraction on each side of the HDD bore or casing pipe
- All PVC design, manufactured by Westlake Pipe & Fittings

Our CIOD adapters enable installation crews to complete their jobs quickly and easily while also making the transition without the need of metallic components.

CERTA-LOK FABRICATED ADAPTERS IB FEMALE X CERTA-LOK MALE						
Nom. Size	Part Number	DR	OD	L	Bell Depth	B
6"	82157745905	DR 18	6.900"	26.5"	13"	12.25"
8"	82157745906	DR 18	9.050"	30.5"	15.25"	14.5"
12"	82157745907	DR 18	13.200"	36.5"	17.5"	16.75"

For further questions regarding gasket joints used across Westlake Pipe & Fittings' various PVC pipe systems, please contact our technical services department:

- Email: technical@westlakepipe.com
- Phone: 484-435-7474

Note: A new maximum insertion line should be added to the spigot end of the non-Certa-Lok pipe based on dimension 'B' shown in the table above
